I. Read the text.

Eighty years after his death, the name Harry Houdini remains synonymous with escape under the most dire circumstances. But Houdini, the immigrants' son whose death-defying career made him one of the world's biggest stars, was more than a mere entertainer.

A new biography of the legendary performer was released on Halloween, the anniversary of Houdini's untimely death at 52. It suggests that the elusive superstar worked as a spy for some European states, all before he was possibly murdered. The authors lay out a scenario where Houdini, using his career as cover, managed to travel the world while collecting information for law enforcement.

The authors believe that at Scotland Yard in the early 20th century they helped launch Houdini's European career by allowing the performer to demonstrate his escape skills. Once, at an arranged demonstration Houdini slipped free from a pair of Scotland Yard handcuffs as an audition for a London theater owner. A similar situation occurred in Chicago, where Houdini's career took off after a publicity stunt aided by a local police lieutenant.

Houdini was a relentless self-promoter, although he didn't play his audience for suckers. The biography recounts one 1902 escape, in Blackburn, England, where Houdini refused to surrender despite the use of plugged locks that made his freedom almost impossible.

After two hours, Houdini escaped to a standing ovation. The next day his arms were "hideously blue and swollen, with large chunks of flesh torn out," the book recounts. Because of the way the chains and rigged locks were fastened, Houdini "had no choice but to tear out the chunks of his flesh to get free."

Houdini's renown was such that he could get out of anything, which was a myth, but it eventually overshadowed the man. Some people thought, 'He's a human, I'm a human, he can beat anything, so maybe I can beat some things'.

Yet, he was known around the world by a single name long before Sting or Madonna.
